CLIK B2B Networking Meet 2026

6th March, Bengaluru

VoltSpark

Save Energy. Stay Safe. Win Customers.

Energy & Compliance Management Platform
for Indian Electronics Manufacturers

LIVE DEMO
`volt-spark.vercel.app`

THE PROBLEM

Electronics manufacturers are losing money they can't see

1. Energy Costs Are Invisible

SMT lines, reflow ovens, ATE — all heavy consumers.
Hidden PF penalties: **₹5K–20K/month**
Demand overshoot charges unnoticed.
₹8–9/unit eating into thin margins.

2. Compliance is a Nightmare

ZED — linked to subsidies & GeM.
ISO 50001 — OEMs like Bosch, L&T demand it.
Electrical Safety — insurance requires it.
Currently: Excel + WhatsApp + email

3. Can't Prove Improvements

Installed APFC/VFD/LED — where's the ₹ proof?
Consultant advice — no ROI tracking.
OEM asks "energy efficiency?" — no data.
No proof = no value

VoltSpark

THE SOLUTION

Tally for Energy & Compliance

Simple. No hardware. Built for Indian industry.

🔎 Utility Bill Analyzer
Enter BESCOM bill → auto-detect PF penalties, demand overshoot, anomalies

📈 Energy Tracking
Grid, solar, DG consumption — monthly trends, year-on-year comparison

✅ Compliance Dashboard
ZED, ISO 50001, Electrical Safety — checklists, evidence, scoring

💰 Savings Tracker
Track actual ₹ saved per improvement — VFD, LED, APFC, solar

📊 ROI Calculator
Payback period, NPV, IRR — for solar, VFD, APFC, LED, motors

👥 Multi-Tenant
Consultants manage 10+ factory clients from one portfolio dashboard

WHY THIS MATTERS TO YOU

Built for Electronics Manufacturers

YOUR SITUATION	WHAT VOLTSPARK DOES
BESCOM bill is ₹3–8 lakhs/month	**Find hidden PF penalties & demand overshoot**
OEM customer asks for ZED / ISO cert	**Digital compliance tracking with evidence**
Installed solar/VFD but can't prove ROI	**Savings tracker with ₹ proof month-by-month**
Energy consultant gives advice	**Track if recommendations actually saved money**
Insurance audit for electrical safety	**Inspection records, certification tracking, expiry alerts**
Want government subsidies (CLCSS, ZED)	**Auto-match eligible schemes, track applications**

If you have an electricity bill and compliance requirements — VoltSpark is for you.

VoltSpark

TRACTION

Not a Pitch Deck.
A Working Product.

31	20	1	0
Modules	Months of Data	Customer Live	Hardware Needed

- ✓ First customer — CNC machining factory in Peenya, Bengaluru
- ✓ Cloud-based — works on phone & laptop, no installation
- ✓ Enterprise-grade multi-tenant architecture
- ✓ Government schemes database with auto-eligibility matching
- ✓ **Made in Bengaluru for Indian industry**

PRICING

Pays for itself in Month 1

STARTER	POPULAR PROFESSIONAL	ENTERPRISE
Free	**₹2,999**/mo	**Custom**
Single factory Basic energy tracking	Up to 10 factories All features included	Unlimited factories White-label for consultants

The ROI is simple
If VoltSpark catches even one PF penalty of ₹8,000/month — it pays for itself **3x over**.

VoltSpark

GET STARTED

Three Things You Can Do Right Now

1. **Try the demo on your phone**
   volt-spark.vercel.app → demo@voltspark.in / demo123

2. **Bring your last BESCOM bill**
   I'll show you in 2 minutes if you're paying hidden penalties

3. **Talk to me at the table**
   If you run a factory or consult for one — let's discuss

Save Energy. Stay Safe. Win Customers.
